JB brought the meeting to order.

1. **Certificate of Appropriateness for new sign at 90 Main Street, Map 43 Parcel 192** - Review and vote on new sign

John Leclerc presented the new Gulf sign. No illumination, 6" white aluminum frame, 3/16" plastic panels on each side, 6 square feet, 6' high, round metal post. The proposed sign will be located in the same location as the previous sign.

The HDC discussed that this is a new sign application. The HDC struggled with the proposed sign, as the HDC guidelines suggest wood or wood-like signs and painted wooden 4"x4" posts.

JB made a motion to approve the sign application with no illumination and located in the same location as the previous sign. KF seconded.

During discussion, the HDC expressed concern that the proposed metal/plastic sign with a round metal post was not appropriate.

The applicant was provided the opportunity to make changes to the sign, but declined at this time.
